WELCOME TO LEX POOLS

There is nothing more inviting than a crystal clear pool at the perfect temperature

Since 1998 Lex Pools (CK98/70561/23) has been at the forefront of the pool heating and automatic chlorination solutions. Through our vast experience in both domestic and the commercial swimming pool industry, we can supply and install high quality systems to satisfy your needs.

Our commercial portfolio includes:

- Crawford College (Craigavon)
- Rodean School (Parktown)
- St Andrews School for Girls (Bedfordview)
- Eastco Holiday Resort (Magaliesberg)
- Hillendale Rehab Hospital (Bloemfontein)
- Netcare Rosebank Rehab Centre (Rosebank)
- Dainfern Country Club (Dainfern)

THIS
These comprehensive list does not include the more than 50 swimming pools in the Gauteng area that have experienced the Lex Pools treatment.

At Lex Pools we are committed to both quality products and excellent service. With our dedicated, well trained and professional staff you can be certain of high quality installation and premium after sales service.

SWIMMING POOL COVERS

Solar pool covers, by design, allows the sun's rays to pass through the cover, adding free heat to your swimming pool and raising its overall temperature by up to 5°

During the night, heat loss will be reduced by 80% when using solar pool covers. These covers can be used where no alternative form of heating is present or extra heat is required in a heated pool.

The solar cover is available in Royal blue or black and can be sized to suit any shape or size of pool. The cover floats on the pool and does not require any form of fixing to the sides of the pool and roll-up systems are available and can be installed in conjunction with the pool cover.

Swimming Pool

SUN COMMAND SOLAR BLANKETS

Sun command solar blankets offer these key features :

- Up to 5°C rise in overall temperature
- 95% drop in evaporation
- Less chemical usage
- No hooks or plates on paving
- 2 year warranty
- Reduces pool maintenance

PRO-BATA

Each cover comes, as standard, with a solar protection sheet to prevent damage from UV rays when removed from the pool.

Each cover is manufactured from UV treated polyethylene design to withstand the harshest conditions, extreme changes in ambient temperatures between day and night time periods.

SOLID COVERS

Solid covers provide ultra-protection from the elements for any pool

Solid covers are made from a heavy-duty reinforced PVC material. They are designed to prevent dirt, dust, leaves and water from entering the pool, offering a 95% reduction on chemical usage and evaporation as well as vastly reducing filtration time. The cover also insulates the surface resulting in decreased heat loss.

Solid covers can withstand the weight of an adult but it should be noted that rainwater can gather on top of the cover posing a drowning risk to small children.
